Situation 1:

I have a problem with my car.

What kind of problem do you have?

I can't start it.

Have you checked a battery?

Yes, I checked. I thought too, it might be something wrong with battery. But, everything is Ok.

Maybe the cause is the car's electronic system? I suppose, the best thing is to call an authorised mechanic to solve this problem immediately.

Situation 2:

Hi, I didn't see you at our class today.

Sorry, I have a problem with Skype.

Have you the same problem after restarting your computer?

Yes, but the application won't start. Do you think it could be a virus?

I am not sure, it might be some bug. Have tried reinstalling Skype?

No, but thank you for your advise. I 'll try it!
