I graduated University of Latvia and have a Master's degree in Management. For 10 years I worked as a head of Business Center, the area of commercial and warehouse premises of which was 2500 square meters. I was responsible for negotiating deals in cooperation with representatives of more than 30 companies, including conclusion of contracts, office and warehouse work organization, collaboration with construction companies and government agencies. On average I have been able to help the owners of Business to really double the profit in less than 2 years and ensure a steady increase in profits over the past years.And that's what I am passionate about. Later, when I moved to a new country, I worked as a head of Organisations for children as a volunteer. More than 10 educational courses, different activities for children from 2 till 20 years and training courses for parents were organised during this time. This project was really successful in view of the constant desire of parents to bring more and more new children in our school. I think my real strength is an ability to truly understand what the audients wants and offer the according product and service. I was not stopped learning at any time to be ready to solve different kind of tasks. Currently I am studying software development to understand how the work in this area of our life is arranged. I want to get some experience of IT. What I am looking for is a company that I could add my experience and value to, that I could produce a positive return on investment for. Where I could join a strong team. *Is this what your company looking for?*
